A DEDICATED MEMORY CARE COMMUNITY

Premier memory care

Our sole focus on residential memory care makes The Madeline the premier Alzheimer's disease, dementia and memory loss specialists in the area. Our devoted care team and state-of-the-art residences are curated specifically with memory care in mind.

Focused, unique and thoughtful

At the Madeline of Decatur, we are 100% focused on providing the best memory care possible.

Our entire community, Associate Care Team and programming revolve around bettering the lives of those with Alzheimer's disease, dementia and memory loss—and unlike other communities that offer assisted or independent living, memory care is everything we do.

Our personal approach to memory care makes what we do a truly special experience, and all aspects of living at The Madeline are curated for the comfort of your loved ones.

Original programming that makes a difference

Our programming humanizes activities and schedules using a one-of-a-kind approach we call "Therapeutic Simplicity."

Therapeutic Simplicity does not subscribe to any single existing system but takes the best aspects of several notable systems used in other communities across the world. In other words, your loved ones are receiving the best of the best.

Well-rounded programming areas

Therapeutic Simplicity addresses seven specific programming areas to address all areas of our residents' unique needs. These seven areas are addressed throughout the daily activity schedule, life stations and individualized programming within the community. Each activity is coded according to programming area so it is easy to identify what area of programming is being addressed at all times.

Proven resident interaction therapies

We deliver the components of Therapeutic Simplicity by weaving interaction therapies into our residents' daily routine. These methods provide a level of engagement and comfort for our residents while enabling them to live fulfilling lives.

VELOCITY

Series of stimulating cognitive activities to generate positive responses.

OSHIBORI

Pre-meal Japanese warm wet towel ritual utilizing sensory engagement and interaction.

GRAB AND GO

Variety of resources full of failure-free impromptu small group and one-on-one activities.

STAR -- SPECIFIC THERAPEUTIC ASSISTED RECREATION

Positive interaction and gentle reminiscing using personal items with family and friends.

REST AND RESTORATION

Comprehensive interventions that promote calming effects for those experiencing brain changes.
